

Let's perform together

ears4U is there for everyone who wants to blast, blaze, shine and rock on stage or simply wants to move and touch. From singers, entire bands and session musicians to DJ's and comedians. For famous and less known names. Artists in every scene, at every level.

As a supplier and maker of in-ear monitors we would like to be your partner in performance.

“Difference is not only audible, you also have to feel it. That's why the listening sessions are so very important.”

Call us for a non-binding listening session!

STAG

BY EARS4U

in-ear monitors. re-invented.

in-ear monitors. re-invented.

Anyone on stage knows: better sound means better performance. That is why we at ears4U have reinvented the IEM. Few people know that conventional in-ears have been building on the same technology for years. We have reconstructed it from scratch. The STAGE is completely handmade, always has exactly the number of drivers you need. Including a super tweeter that sounds clearer than ever.

The result is a delight to the ears. Add to that our exceptional build quality, personalized artwork and extensive service and you know: you'll never want anything else.

Stand out from the crowd. And take the STAGE!

STAGE 2.4

Drivers	8 per side

€ 935,- ex VAT

“ How big is the difference between a 2-way or 3-way system?
Come by and we'll let you hear it!

Choose your own artwork!

At ears4U you have direct contact with the makers. And nothing is too crazy for us. Your initials, your own logo, lots of bling or super neat. We'll make your in-ears a perfect fit, and to your taste. So tell us... How personalized do you want it?

“ Our listening sessions are actually also viewing sessions.

We are happy to show you what the possibilities are.

Examples?

Our supertweeter

For the STAGE we have reinvented every part. The latest technology provides a completely new sound palette. There is also our new supertweeter. High frequencies sound brighter than ever. And that puts the mid, high and low tones in a new dimension. More “space” is created. Your total sound can be seen in a new light.

Time to shine!

Come by
and hear the
difference!
